What colors do you like and dislike to wear?

Hello. My name is Veronica, and I'm from the United States. My question today is what colors do you like and dislike to wear?

Obviously, one of the colors that I like to wear is blue. I think it's my favorite color to wear because I feel like *it suits* my skin tone very well. Since I have a lighter skin tone and darker hair, *I feel like* blue looks very good on me. Sometimes I wear a *muted* blue like I am today. Sometimes I wear a very bright, like a royal blue. Either one of those I think really looks nice on me, and so it is actually my favorite color to wear.

My least favorite color to wear is yellow. You won't find a lot of yellow in my *wardrobe*. And the only reason is I think yellow is a beautiful color. It is bright. It is *captivating* and it looks so good on so many people. I just don't feel like yellow looks good on me. So it is *very rare* that you will ever see me wearing the color yellow.
